

“Learning Lingual” – The five levels of lingual competence

Dirk Wiechmann, Bad Essen and Hannover

Even a high-quality lingual appliance does not work in the hands of an orthodontist without lingual competence. The presentation will enable the very beginner to make a strategic planning of his lingual education. Based on hands on courses in combination with teaching videos and 1 to 1 clinical sessions, all options of the “learning lingual”- strategy will be described and put together to a program with five levels of lingual competence. Learning and following the protocol is the one and only key to become a successful lingual orthodontist.
